COURSES

Digital Skills Training on Python Programming

ICT for Kosovo's Growth

Oct 2022- Feb 2023

- This training focused on developing digital skills in Python programming. It covered the basics of the language, data structures, functions, and practical applications for problem-solving.

Full-Stack Development Training

Ministry of Economy-KODE

Feb 2023 -Jun 2023

- The training within the KODE Project (Kosovo Digital Economy), implemented by the Ministry of Economy and supported by the World Bank, focused on building technical skills for Full-Stack Development. The curriculum covered technologies such as Node.js, MongoDB, SQLite, and Angular, emphasizing both front-end and back-end development.
